Precipitation probability							
30%	30%	10%	10%	20%	40%	40%	10%

Forecast for Tuesday 26 Mar 2024

Weather: Some light rain overnight. During the day it will be cloudy and quite grey and dull at times, the morning is expected to remain dry but light and patchy rain will affect the hills at times, especially western peaks, during the afternoon. The best weather conditions are likely to be in the east.

Chance of cloud-free hill tops above 800m: 40% low cloud at times associated with a frontal system over Wales.

Low Cloud and visibility: Layers of scattered or broken low cloud are likely at times during the day, especially during the afternoon when the cloud bases will lower. In the morning cloud bases will be above 500m but during the afternoon and evening lowering to 300m at times. Visibility will be good during the morning but becoming moderate or poor at times during the late afternoon and evening in rain and drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling quite chilly with a significant wind chill at height during the day. Rain may turn to sleet on Snowdon summit but mostly freezing level above all summits.

Forecast for Wednesday 27 Mar 2024

Weather: A blustery day with frequent showers, the showers may group in the morning for a time giving a longer spell of rain or sleet. The showers will be wintry on the highest summits in the morning but turn wintry to 600m through the afternoon. A few brighter or sunny spells out with showers in the afternoon.

Maximum wind: Southerly 25mph with gusts 35-40mph.

Chance of cloud-free hill tops above 800m: 40% rising to 60% in the afternoon.

Low Cloud and visibility: Layers of scattered or broken cloud above 400m in the morning, the cloud will lift and start to thin during the afternoon with some brighter spells on the summits at times. In showers cloud will lower over summits again. In wintry showers visibility will become poor for a time with whiteout conditions possible for a time in blizzard conditions. During brighter spells in the afternoon visibility will be good for short spells.

Temperature: **Valleys:** Plus 3 Celsius rising to 7 Celsius.
At 800m: Zero Celsius falling to Minus 2 Celsius.
Freezing level: 900m falling to 600m
